

Cloverleaf School-to-Work Program

Will you provide Cloverleaf High School students with special needs a community-based, vocational training opportunity? Our students can complete a variety of tasks for your business including, but not limited to:

- Light housekeeping (*including vacuuming, dusting and dishwashing*)
- Stocking
- Sorting
- Light assembly
- Simple food preparation
- Greeting
- Shredding
- Recycling
- Delivering messages/materials within your facility

Perhaps you have ideas how our students may assist your business!

Our students have many abilities and need extensive vocational training in authentic community-based settings, tailored to their unique needs in order to prepare them for life after high school.

Our Intervention Specialist and Paraprofessionals accompany students to provide supervision and support. Students are covered under the district's liability policy as they are for field trips.

Your commitment would be to provide students with vocational tasks one day per week for 6-9 weeks, for approximately 1 hour per day.

There is no cost to your business. Rather, it's an opportunity to make a positive contribution in the lives of Cloverleaf students!

Thank you!
